# KONSTANTIN ARUTJUNOV

## Senior IT Business Analyst

Estonia | Open to opportunities and relocation in Switzerland

konstantin.arutjunov@gmail.com linkedin.com/in/konstantin-arutjunov

### PROFESSIONAL PROFILE

Senior IT Business Analyst with 10+ years across IT, from software engineering and enterprise systems to business analysis in banking and lending. I connect business needs with practical technology through systems analysis, requirements engineering, API integration and end-to-end delivery support.

### SELECTED OUTCOMES

**CONSUMER LOAN ORIGINATION**

**Approx. 2 hours to 3 minutes**

Analysis contribution to an automated consumer lending process.

**INSURANCE RENEWAL AUTOMATION**

**Approx. 65% to 90%**

Analysis support for automated renewal notifications and collateral insurance coverage.

Figures are approximate outcomes reported in the professional profile.

### PROFESSIONAL EXPERIENCE

**Luminor Group** 2021 - Present

**Senior IT Business Analyst**

- Business and systems analysis across the retail lending lifecycle, from requirements definition through testing, UAT and delivery.
- Contributed analysis for automated consumer loan origination, reducing processing time from approximately 2 hours to 3 minutes.
- Defined requirements for credit-limit monitoring, credit risk and Early Warning systems.
- Supported insurance renewal notifications and API-based collection of bank account statements from external banks.
- Collaborate with business stakeholders, product owners, developers and QA throughout delivery.

**Creditstar Group AS** 2019 - 2021

**IT Business Analyst**

- Analysed lending, credit-risk and digital-onboarding requirements for web and mobile platforms.
- Documented workflows and requirements with stakeholders, vendors and development teams.
- Supported SMS and phone verification, functional testing, integration testing and user acceptance testing.

Earlier experience, capabilities and education

## EARLIER PROFESSIONAL EXPERIENCE

### Kuehne + Nagel
2017 - 2019

**System Engineer**

- Combined systems analysis, requirements clarification and third-line support for enterprise printing and document-management solutions.
- Prepared Jira tasks and system specifications; created XML/XSLT document models and supported document-storage functionality.
- Performed manual, load and performance testing; investigated production issues and identified root causes.

### SEB
2015 - 2017

**Front-end developer (Internet Banking)**

- Contributed to customer-facing internet banking serving 600,000+ customers.
- Developed functionality with Progress ABL, JavaScript, CSS and XSLT; implemented investment-product suitability interfaces, responses and results.
- Investigated and resolved production defects in a banking environment.

### Spin TEK AS
2013 - 2014

**PHP Developer (Trainee)**

- Government-sector software development, functionality and bug fixes using PHP, MySQL, JavaScript, HTML and CSS.
- Tested changes and worked with SVN and CVS version control.

## CORE CAPABILITIES
