PROFILE

Senior IT Business Analyst with 12+ years in IT, including 7+ years in business and systems analysis. My background spans software development, testing, integrations and production support across banking, FinTech, startups, logistics and government projects. I combine requirements engineering with a practical understanding of APIs, data, automation and cloud services to help business and engineering teams turn complex needs into reliable solutions.

SKILLS

Business Analysis: Requirements engineering, systems analysis, solution design, BPMN, user stories, use cases, acceptance criteria, workshops, stakeholder management

Integration & Data: REST/SOAP APIs, system integration, SQL, data analysis, JSON/XML

Cloud & Automation: Google Cloud, infrastructure fundamentals, RPA automation
Tools: Jira, Confluence, Postman, SoapUI, Swagger, Excel, Tableau (basic)

Delivery & Testing: Agile, Scrum, Kanban, functional and integration testing, user acceptance testing (UAT), root cause analysis, change management

Technical Background: JavaScript, XML/XSLT, SQL, HTML/CSS

Banking Domain: Digital banking, retail lending, credit risk, Open Banking, Early Warning Systems, insurance, digital onboarding, CRM and KYC

AI Tools: ChatGPT, Copilot, Codex

WORK EXPERIENCE

Senior IT Business Analyst

Luminor Group | Tallinn, Estonia | Aug 2021 - Present

- Lead retail lending analysis, aligning scope with stakeholders, product owners, developers and QA from requirements workshops through testing and rollout.
- Defined user stories and acceptance criteria for automated consumer loan origination, reducing manual work and processing time.
- Specified Open Banking API integration for external bank statements, replacing manual uploads in Estonia.
- Defined credit-limit monitoring and Early Warning Systems requirements to help loan advisers identify high-risk credit cases.
- Provided analysis for automated insurance renewal reminders; collateral insurance coverage increased from approximately 65% to 90%.

WORK EXPERIENCE

IT Business Analyst
Creditstar Group AS | Tallinn, Estonia | Aug 2019 - Aug 2021

- Analysed requirements for web and mobile lending platforms, covering credit risk and digital onboarding.
- Created user stories, acceptance criteria and BPMN workflows with stakeholders and vendors, managing requirements in Jira and Confluence within Scrum and Kanban teams.
- Supported SMS and phone verification for customer onboarding and performed functional, integration and user acceptance testing.

System Engineer
Kuehne + Nagel | Tallinn, Estonia | Sep 2017 - Aug 2019

- Translated business requirements into Jira tasks and system specifications for enterprise printing and document management.
- Created XML/XSLT document models and contributed to a new document storage solution.
- Performed manual, load and performance testing, investigated production issues and provided third-line support.

Front-end Developer (Internet Banking)
SEB | Tallinn, Estonia | Dec 2015 - May 2017

- Developed internet banking functionality for a platform serving 600,000+ customers.
- Implemented investment-product suitability interfaces, responses and results using JavaScript, CSS, XSLT and Progress ABL.
- Investigated and fixed production issues.

PHP Developer (Trainee)
Spin TEK AS | Tallinn, Estonia | Nov 2013 - May 2014

- Developed and tested government-sector software, implementing features and fixing bugs with PHP, MySQL, JavaScript, HTML and CSS.
